Runlock Rope – What is it

Runlock loop rope is 100% braided polyester silk, is in essence two strands that run parallel to each other and then are braided at intervals to form loops.

The loops which are braided along its entire length generate unlimited possibilities for the user.

One of the great benefits of Runlock system is that you do not need to know how to tie any knots. The rope attaches to and through itself and to an object by making use of the integral braided loops.

No knots to jam, come untied or come loose. Soft and pliable, Runlock is simply much more than just a rope.

You can create fixed grips, snares and locks in an instant, or use it for tight strapping or heavy pulling, simple and fast.

Easy to tie and untie! It couldn't be easier!

Runlock is perfect for outdoor people, professionals or as an all-round tool.

Why Runlock

- > Swedish product of highest quality
Trusted brand for 30 years in Europe
